## CONSTRUCTING A SUSTAINABLE FUTURE

At VINCI Construction Grands Projets, we engineer solutions that are not only financially competitive, but work sustainably for the planet. Superior design and construction practises are helping us save 20,000 tonnes of CO<sub>2</sub> emissions in two years. At Clackmannanshire Bridge in Scotland we responded innovatively to sensitive environmental factors. We've left a legacy of reduced traffic congestion and pollution for local residents, and have enlarged the local wildlife habitat by hectares. Just one way in which VINCI Construction Grands Projets demonstrates sustainability leadership.
